UNCLASSIFIED

CANADIAN SECURITY INTELLIGENCE SERVICE

CSIS IS DEDICATED TO THE PROTECTION OF CANADA'S NATIONAL SECURITY INTERESTS AND THE SAFETY OF CANADIANS

CORE MANDATE

- Investigate activities suspected of constituting threats to the security of Canada
- Advise the Government of these threats
- Take measures to reduce threats to the security of Canada

THREATS TO THE SECURITY OF CANADA

- Terrorism
- Espionage and sabotage
- Foreign influenced activities detrimental to the interests of Canada
- Subversion of government through violence

DUTIES AND FUNCTIONS

SECTION 13

PROVIDE SECURITY ASSESSMENTS TO THE GOVERNMENT OF CANADA

GOVERNMENT SECURITY SCREENING

- ✓ Site Access: 91,000
- ✓ Government: 75,500
- ✓ Provinces: 240
- ✓ Foreign: 570

SECTION 14

PROVIDE SECURITY ADVICE RELEVANT TO THE EXERCISE OF THE CITIZENSHIP ACT OR THE IMMIGRATION AND REFUGEE PROTECTION ACT

IMMIGRATION SCREENING

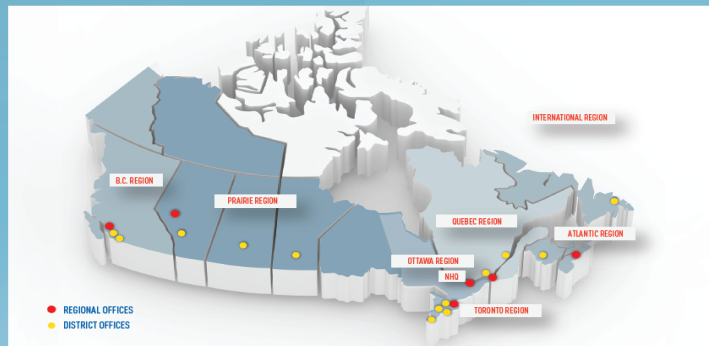

- ✓ Citizenship: 216,800
- ✓ Perm Resident: 18,000
- ✓ Temp Resident: 43,300
- ✓ Refugees: 46,400

SECTION 16

CONDUCT FOREIGN INTELLIGENCE COLLECTION WITHIN CANADA AT THE REQUEST OF THE MINISTERS OF FOREIGN AFFAIRS AND DEFENCE

- Can only be carried out within Canada
- Must not target a Canadian citizen, permanent resident or corporation

CSIS ACROSS CANADA

ACCOUNTABILITY MATTERS

PEOPLE OF CSIS

- + 3200 employees
- 20% racialized persons
- incl 2% Indigenous persons
- 4% persons with disabilities
- 119 languages and dialects spoken
- 68% speak both official languages

PARTNERSHIPS

- Over 80 arrangements with domestic partners
- Over 300 arrangements with foreign partners in over 150 countries
- Robust information sharing framework ensures conformity to Ministerial Direction

ACCOUNTABILITY

- Federal Court
- Minister of Public Safety
- National Security and Intelligence Review Agency
- National Security and Intelligence Committee of Parliamentarians

DEPARTMENTAL RESULTS

- CSIS obtains relevant information and intelligence to carry out its national security activities.
- CSIS intelligence informs government decisions and actions relating to Canada's security and national interests.
- CSIS threat reduction measures diminish threats to the security and safety of Canada and Canadians.
- The assessments of the Integrated Terrorism Assessment Centre inform Government of Canada decisions and actions relating to the terrorism threat.

Statistics as of end of fiscal year 2019-20.

Role of CSIS in GoC Research Security Approach

- National security investigations – collect intelligence, conduct analysis, provide advice to GoC
- Intelligence assessments – conduct threat assessments to inform granting agencies funding decisions National Security Guidelines for Research Partnerships
- Liaison – Maintain local operational and tactical relationships, contact to report suspected threat activity
- Academic outreach & Stakeholder engagement – increase awareness of threat and mitigations, conduit to GoC partners and operational colleagues

Canadian Security
Intelligence Service

Service canadien du
renseignement de sécurité

Current Geopolitical Context

- What's changed?
- Autocracy vs. democracy
- Technology & science critical indicators of power and competitiveness
- Civil-military fusion programs
- New capabilities of threat actors – technological, operational, legal
- Certain adversaries using any and all means, from abroad and within Canada
- Adversary approach requires collective resilience and collaborative response
- War in Ukraine – Threats Against Taiwan – Global Instability
- New opportunities and challenges in Indo-Pacific

Canadian Security
Intelligence Service

Service canadien du
renseignement de sécurité

R&D and Innovation Critical to Canada's Future

- Economic impact
- Contributions to global development and prosperity
- Technological and scientific advances
- Vehicle of soft power
- Attraction of talented students and workforce
- Opportunities for future generations
- Support for Canadian policies and commitments
- Retaining Canada's place in the world

Research Security Protecting Canadian Data Science & Technology

Canada is a global research leader, due to our world-class universities, public and private research organizations, and human talent.

Canada's innovative reputation attracts threat actors: they exploit our principles of open science and collaboration; disregard Canada's laws and values; and disguise their role in serving a foreign state agenda to obtain valuable Canadian data, intellectual property (IP) and know-how.

These deceptive and malign activities harm Canada's safety, security and prosperity interests. Canada's research integrity is undermined; our knowledge-based economy is stolen; and threat actors gain powerful and destabilizing surveillance and military capabilities.

Who & Why

- Hostile state actors, particularly China and Russia, pose the greatest threat.
- In our digital era, threats can arise from anywhere, including from non-state actors.
- The world is increasingly competitive. Hostile states seek advantage at Canada's expense. They look to advance their economic, technological, intelligence and military state interests.
- Policies and practices of Military-Civil Fusion, coercive national security laws, and state capitalism pose a growing threat.

What

Almost all Canadian research domains face some level of risk; but the top five targets are:

- Biopharma & health
- Artificial intelligence (AI), quantum, and big data
- Semiconductors, 5G, and smart cities
- Ocean technology, including sensors
- Aerospace technology, including hypersonics

How

Sophisticated threat actors will exploit vulnerabilities, including via deceptive means, such as:

- Traditional espionage
- Cyber espionage
- Insider threats
- Non-traditional collectors
- Talent spotting
- Research funding
- Unsafe supply chains (equipment, services)
- Joint ventures
- Minority investments (e.g. venture capital)
- Foreign acquisitions (foreign direct investment)

SENSITIVE LABORATORIES

Threat actors seek direct or indirect access to sensitive laboratories.

INTELLECTUAL PROPERTY (IP)

Control over IP may be lost, with all gains accruing to foreign states.

DEFENCE & DUAL-USE

Researchers may knowingly or unwittingly contribute to foreign military capabilities

ACADEMIC LEADERSHIP

Leading academics and administrators may be targeted or leveraged.

RESEARCH GRANTS/FUNDING

Government funding may be subverted, and foreign funding may co-opt Canadian research and IP.

These threats are real; and Canada is not unique in managing these challenges and risks.
Most importantly, you are not alone in facing these threats.

613-993-9620 (24/7) • <https://www.canada.ca/en/security-intelligence-service/corporate/reporting-national-security-information.html>

Critical & Emerging Technologies Targeted

- Intelligence agencies are increasingly seeing adversaries use any and all means to acquire critical and emerging technologies for competitive advantage.
- As seen in this excerpt from a recent Privy Council Office National Intelligence Assessment, this includes many of the areas in which DTS members work.
- Some of this research is also targeted and known as '[sensitive technologies](#)' due to its possible application in military, intelligence and surveillance programs.

Ways & Means

- Illicit technology transfer
- Espionage – human and cyber
- Talent and scholarship programs
- Foreign investment
- Licensing
- Joint Ventures, partnerships, agreements, collaboration
- Recruitment – Witting and unwitting
- Non-traditional collectors
- Elicitation
- Coercion
- Travel
- Supply chain

Consider intent
and character of
activities.

Activities of
concern are
covert, opaque,
coercive

Focus: Insider Threat

'An insider threat/risk is an individual who either wittingly or unwittingly misuses or exploits, or intends to exploit, their legitimate access to the assets of a department of the Government of Canada, causing harm to Canada's national interest through espionage, terrorism, unauthorized disclosure of information, or loss or degradation of a capability to deliver a service or a product.'

renseignement de sécurité

Threats to Research Security – Institutional Impact

- Financial
- Reputational
- Academic principles, ethics and integrity
- Legal
- Trust deficit
- Data, cyber and infrastructure integrity
- Privacy
- Policies, procedures, agreements
- Future prospects

Canadian Security
Intelligence Service

Service canadien du
renseignement de sécurité

Threats to Research Security – National Impact

- Economic prosperity
- Military/defence
- Human rights
- Foreign affairs & commitments
- Innovation future
- Trust in government
- Trust in science and academia more broadly
- Impact on democratic institutions
- Attracting immigration
- Reputation and global influence

Mitigation Measures

- Risk-Based Plans
- Capacity-building in due diligence
- Codes, policies, processes, reporting; identify institutional 'red lines' (if any)
- Training, awareness, tools
- Security culture with layered lines of defence
- Oversight mechanisms
- Security screening/vetting
- Data management and research security plans
- Legal review of all agreements
- Diversify funding sources
- Access controls & segregation of most valuable assets
- Seek advice – Government, allied counterparts
- Use of OSINT tools – public and commercial
- Threats evolve – reassess mitigation routinely
- Leverage assets already in your institution (e.g. interdisciplinary expertise)

Elements of a Successful Partnership

Whether in life or research, there are common attributes of a successful partnership. These include:

- Trust
- Respect
- Reciprocity
- Openness
- Honesty
- Transparency
- Common interests, values, ethics
- Shared partnership objectives
- Good communication
- Framework for cooperation
- Dispute resolution mechanism
- Individual autonomy

Government of Canada response – Research Security Highlights

2016 – Creation of [Safeguarding Science](#) program

2018 – [Establishment of GoC-Universities Working Group](#)

June 2020 – [Joint CSIS-CSE statement](#)

March 2021 – [Research Security Policy Statement](#)

July 2021 – [National Security Guidelines for Research Partnerships](#) and supporting resources ([Safeguarding Your Research](#) portal)

April 2022 - [Budget 2022](#): funding for Research Security (\$159.6 million, starting in 2022-23, and \$33.4 million ongoing), intellectual property regime, Canada Excellence Research Chairs, creation of Canadian Innovation & Investment Agency

Government of Canada response – Research Security Highlights

(continued)

Fall 2022: Release of new [OSINT due diligence guide](#) and guidance on developing a research security plan – updates to Safeguarding Your Research. Investments in S&T and research security through Indo-Pacific Strategy.

December 2022: New [guidance](#) on research security funding available through the Research Support Fund

February 2023: [Statement from Minister Champagne, Minister Duclos and Minister Mendicino on protecting Canada's research - Canada.ca](#)

Forthcoming:

- First meeting of Classified Information Exchange Roundtable (April 2023)
- Publication of *revised* Risk Assessment Form.
- Publication of guide on risk mitigation strategies and progress report on implementation.
- New AOSE publication: Research Security Quarterly.
- Expansion of National Security Guidelines for Research Partnerships to additional funding streams

Ongoing and complementary: sanctions regime, export controls, visa vetting, Controlled Goods Program, Safeguarding Science program

Canadian Security
Intelligence Service

Service canadien du
renseignement de sécurité

Alberta as a Target

/ As a core part of its mandate, the Canadian Security Intelligence Service (CSIS) investigates and advises the Government of Canada on threats posed by espionage and foreign-influenced activities. As the world becomes more competitive, states are seeking every advantage. In order to fulfil their economic and security or military priorities, some foreign states engage in espionage. This foreign espionage has significant ramifications for Canada, including lost jobs, corporate and tax revenues, as well as diminished competitive and national advantages.

- Strengths and expertise in artificial intelligence, big data, geomatics, and interactive digital media.
- Emerging and growth sectors in Alberta like agri-tech, biotech/biomanufacturing, clean-tech, quantum, and fintech.
- Important research and development projects in bio-energy applications, carbon capture and storage, and electricity transmission and distribution infrastructure.
- Location of one of Canada's three National A.I. Institutes
- Home to more than 2,800 tech companies, 4 leading universities, and many tech and innovation incubators.
- Universities received approximately \$295M in granting council funding in FY 2021-22.
- Public post-secondary institutions received approximate \$5M in provincial government funding in 2021-22
