

**Basic time and equipment charges**

Service	Snyder Institute member/assoc. member	Snyder Institute external UofC member
Scientific consultation/analysis time	\$39/hr	\$77/hr
Scientific experimental time	\$39/hr	\$77/hr
Spinning disk confocal scope	\$37/hr	\$37/hr
Multiphoton scope	\$35/hr	\$35/hr
Non-invasive InVivoXtreme	\$44/hr	\$88/hr
Metabolic cages	\$9/hr	\$18/hr
Mouse housing in CCCMG HWH	\$0.84/24hrs	\$0.84/24hrs
Overhead general screens	\$0.75/animal	\$0.85/animal
Overhead intravital imaging screens	\$0.90/animal	\$1.10/animal
Overhead non-invasive imaging screens	\$1.10/animal	\$1.40/animal
BMT irradiation	\$25/session	\$30/session

**Basic reagents and consumables are included in experimental setups for members and associate members of the Snyder Institute.**

An overhead/animal besides the individual screening costs/hr will be charged.

Specific (unique) reagents/dyes needed for experiments (especially for imaging screens) will be discussed and have to be purchased through the collaborating investigator.

For external collaborations/industry contracts outside of the Snyder Institute and the University of Calgary a special experimental setup package regarding costs will be individually designed.

If mice have to be ordered into the Snyder Phenomics resource laboratory the recent prices of the vendor (e.g. Jackson Laboratories, Charles River) plus shipping costs will be charged.
